PROFILE

Motivated Cybersecurity undergraduate at SLIIT with a strong interest in ethical hacking, network security, and secure system design. Hands-on experience in Python, machine learning, and network programming through academic and self-driven projects. Skilled in working with Linux environments and security tools. Passionate about continuous learning and applying technical knowledge to real-world security challenges. Seeking a Cybersecurity Internship to gain practical industry experience.

EDUCATION

2023 - Present **BSC (HONS) IN IT – CYBER SECURITY**
SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY (SLIIT)
Current GPA: 2.48

TECHNICAL SKILLS

PROGRAMMING LANGUAGES: Python, Java, C, R **WEB TECHNOLOGIES:** HTML, CSS, JavaScript

CYBERSECURITY & NETWORKING: Network Security Fundamentals, Ethical Hacking Concepts, Vulnerability Identification

TOOLS & TECHNOLOGIES: Kali Linux, Ubuntu, Wireshark (Basic), Git, GitHub, MySQL, VS Code, IntelliJ IDEA, RStudio

DATA SCIENCE & AI: Pandas, NumPy, Scikit-learn

PROJECTS

AI CAR PRICE PREDICTION SYSTEM

- Developed a machine learning model using Python to predict car prices based on multiple dataset features
- Performed data preprocessing, feature engineering, and model training using Pandas and Scikit-learn
- Evaluated model performance and improved prediction accuracy through iterative tuning

TCP NETWORK PROGRAMMING APPLICATION

- Implemented a TCP-based client-server system using socket programming
- Enabled reliable data communication between client and server systems
- Strengthened understanding of networking protocols and real-world communication models

- HOME TUTOR SEARCH & BOOKING SYSTEM**
- Developed a full-stack web application with role-based access control
 - Implemented secure data handling and authentication mechanisms
 - Deployed system with real user interaction and database integration

- WEB-BASED E-COMMERCE STORE**
- Built a group-based web application with multiple user roles and functionalities
 - Contributed to both frontend and backend development
 - Applied authentication and authorization concepts for secure access

EXPERIENCE

- 2022 - Present **FREELANCER & DESIGNER | SELF-EMPLOYED**
- Delivered web design, UI/UX concepts, and digital content solutions for clients
 - Designed eBooks, thumbnails, and graphics with a focus on usability and aesthetics
 - Maintained client satisfaction through consistent and high-quality deliverables
- 2024 - Present **ACADEMIC PROJECT DEVELOPER | SLIIT**
- Developed multiple academic projects using modern programming and web technologies
 - Applied version control using GitHub and improved collaborative development skills
 - Strengthened problem-solving, debugging, and system design capabilities

CERTIFICATIONS

- Python for Beginners – University of Moratuwa
- Web Development – University of Moratuwa
- AI/ML Engineer - (Stages 1, 2, 3) – SLIIT
- Introduction to Cybersecurity – Cisco Networking Academy
- Networking Basics – Cisco Networking Academy

ACHIEVEMENTS & ACTIVITIES

- Successfully developed an AI-based Car Price Prediction system
- Completed TCP Network Programming project using socket communication
- Built multiple cybersecurity and programming-related projects
- Actively learning cybersecurity tools and penetration testing techniques
- Continuously improving programming and problem-solving skills

ADDITIONAL INFORMATION

- Strong interest in Cybersecurity, AI, and secure system development
- Self-learner with hands-on experience in Linux environments and security tools
- Passionate about participating in real-world technical challenges and internships
