PROFILE

Cybersecurity undergraduate at SLIIT with hands-on experience in secure web development, TCP/IP network programming, Linux environments, database-backed web applications, and AI/ML projects. Skilled in Python, Java, C, SQL, Git/GitHub, Kali Linux, Ubuntu, Wireshark basics, and Java web technologies. Strong interest in SOC operations, vulnerability identification, network security, cloud security, and secure software development. Seeking a Cybersecurity, SOC, IT, or Software Engineering internship where I can contribute, learn quickly, and build practical industry experience.

TECHNICAL SKILLS

CYBERSECURITY & NETWORKING: Network Security Fundamentals, Ethical Hacking Concepts, Vulnerability Identification, TCP/IP, Socket Programming, Wireshark, Kali Linux, Ubuntu, CIA Triad, Cloud Security Fundamentals

PROGRAMMING LANGUAGES: Python, Java, C, R, SQL

WEB TECHNOLOGIES: HTML, CSS, JavaScript, Java, JSP, Servlets, Bootstrap, Tailwind CSS

DATABASES: MySQL, MS SQL Server, SQL Queries, Database Design

TOOLS & PLATFORMS: Git, GitHub, VS Code, IntelliJ IDEA, Apache Tomcat, Linux Terminal, RStudio

AI & DATA SCIENCE: Pandas, NumPy, Scikit-learn, Data Preprocessing, Machine Learning Model Training

SECURITY CONCEPTS: Authentication, Authorization, Role-Based Access Control, Session Management, Input Validation, Activity Logging, Encryption, MFA, Risk Management

EDUCATION

2023 - Present **BSc (Hons) in Information Technology Specializing in Cyber Security**
SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY (SLIIT)

PROJECTS

NEXUSSHOP - WEB-BASED E-COMMERCE STORE

Java, JSP, Servlets, MS SQL Server, HTML, CSS, JavaScript, Apache Tomcat, GitHub

- Developed a database-backed e-commerce web application with multiple roles including Admin, Customer, Product Manager, Supplier, Delivery Staff, and Customer Service Staff.
- Implemented authentication, role-based access, product/order management, support tickets, SQL database design, and secure input handling concepts.

SMARTTUTOR - HOME TUTOR SEARCH & BOOKING SYSTEM

Java, JSP, Servlets, HTML, CSS, JavaScript, MySQL / File Handling, Apache Tomcat

- Built a full-stack tutor booking platform with user roles, tutor search, booking workflows, authentication, and session-based access control.
- Contributed to frontend, backend, system design, debugging, documentation, and team-based feature integration using GitHub.

TCP NETWORK PROGRAMMING APPLICATION

C, Python, TCP/IP, Socket Programming, Linux, Client-Server Architecture

- Implemented a TCP client-server application to handle reliable communication, client requests, server responses, and connection management.
- Tested in Linux environments to strengthen practical knowledge of networking protocols, system-level communication, and debugging.

AI CAR PRICE PREDICTION SYSTEM

Python, Pandas, NumPy, Scikit-learn, Machine Learning

- Created a machine learning model to predict car prices using dataset features, preprocessing, feature engineering, model training, and evaluation.
- Improved understanding of Python-based data analysis, model testing, prediction workflows, and accuracy improvement.

CLOUD SECURITY CHALLENGES AND SOLUTIONS - RESEARCH REPORT

Cloud Security, CIA Triad, MFA, IAM, Zero Trust, CSPM, DevSecOps

- Prepared an individual cybersecurity research report analyzing cloud threats such as data breaches, misconfiguration, weak authentication, insider threats, DDoS, insecure APIs, and lack of monitoring.
- Mapped cloud risks to confidentiality, integrity, and availability, and proposed solutions including encryption, access control, MFA, logging, risk management, Zero Trust, CSPM, and DevSecOps.

EXPERIENCE

2022 - Present

FREELANCER & DESIGNER | SELF-EMPLOYED

- Designed web pages, UI/UX concepts, thumbnails, eBooks, and digital graphics for personal and client-based work.
- Built practical skills in client communication, requirement understanding, revision handling, time management, and web content creation.

2024 - Present

ACADEMIC PROJECT DEVELOPER | SLIIT

- Developed multiple academic projects using Java, JSP/Servlets, Python, SQL, HTML, CSS, JavaScript, and GitHub.
- Practiced team collaboration, debugging, database design, secure development concepts, documentation, and technical presentations.

CERTIFICATIONS

- Python for Beginners – University of Moratuwa
- Web Development – University of Moratuwa
- AI/ML Engineer - (Stages 1, 2, 3) – SLIIT
- Introduction to Cybersecurity – Cisco Networking Academy
- Networking Basics – Cisco Networking Academy
